About me

Second-year Computer Science student specializing in Software Engineering at CADT. Building on a strong core in programming and systems development through hands-on projects. Focused on sharpening technical skills, writing clean code, and building scalable software solutions.

Experience

Tech Support

Jun 2026 - Aug 2026

Digital Government Committee - Part-time

Provide helpdesk support to staff and users, troubleshooting hardware, software, and system issues to ensure smooth day-to-day operations. Diagnose and resolve technical problems, escalate complex cases when needed, and maintain clear communication with users throughout the resolution process while balancing responsibilities alongside coursework.

Junior Frontend Developer

May 2025 - Dec 2025

Coorad - Freelance

Contributed to frontend development at an early-stage startup using React and Next.js. Built and maintained UI components, implemented responsive layouts, and collaborated with the team to translate design specs into functional web pages. Gained hands-on experience with modern frontend workflows in a fast-paced startup environment.
